

ICS Accomplishes Advanced Wireless LAN Specialization

July 25, 2007—Incident Communication Solution's has met all the Cisco requirements for achieving an Advanced Wireless LAN specialization.

The Advanced Wireless LAN Specialization recognizes partners for their knowledge and expertise in building and maintaining unified wireless LAN solutions. Achieving this specialization will enable you to deliver the wireless solutions your customers need to increase employee productivity and responsiveness, and overcome obstacles to traditional wired connections.

In attaining this specialization, ICS is now qualified to support customers with their Advanced Wireless needs in the United States.

Cisco is the worldwide leader in networking that transforms how people connect, communicate and collaborate. Cisco hardware, software, and service offerings are used to create the Internet solutions that make these networks possible - giving individuals, companies, and countries easy access to information anywhere, at any time.

ICS is a technology solutions provider focused on IP-Centric communications for First Responders, Emergency Communications, Disaster Recovery, and Continuity of Operations. Specializing in the design, development, and implementation of IP-Based communications, ICS provides turnkey solutions for Voice, Video and Data in support of Incident Command and Communications. Using these tools, emergency responders and crisis leadership can rapidly establish essential command presence, resource control, and communication interoperability allowing for critical situational awareness, response and mitigation.
