

Cisco Announces ICS' Recertification for Express Unified Communications

June 13, 2007— Incident Communication Solutions has officially been renewed as a Cisco Express Unified Communications partner.

ICS has met the resource requirements for the renewal of this certification and continues to be qualified to sell, install and support customers with their Express Unified Communications in the United States.

“The Express Unified Communications Specialization is the first technology specialization that integrates key solutions in the area of converged data/voice/video networking and represents the evolution of the Cisco IP Communications Specialization,” states Cisco.com.

Cisco Unified Communications products include Cisco Unified CallManager Express, Cisco Unified IP Phones, Cisco 1800, 2800, and 3800 Series Routers, Cisco 1700, 2600, and 3700 Series Routers, and Cisco Unity Express.

###

Cisco is the worldwide leader in networking that transforms how people connect, communicate and collaborate. Cisco hardware, software, and service offerings are used to create the Internet solutions that make these networks possible - giving individuals, companies, and countries easy access to information anywhere, at any time.

ICS is a technology solutions provider focused on IP-Centric communications for First Responders, Emergency Communications, Disaster Recovery, and Continuity of Operations. Specializing in the design, development, and implementation of IP-Based communications, ICS provides turnkey solutions for Voice, Video and Data in support of Incident Command and Communications. Using these tools, emergency responders and crisis leadership can rapidly establish essential command presence, resource control, and communication interoperability allowing for critical situational awareness, response and mitigation.
