

ICS Achieves Cisco Express Foundation Specialization

June 28, 2007—Incident Communication Solution's has met all the Cisco requirements for achieving an Express Foundation specialization.

The Express Foundation Specialization is the first technology specialization that integrates key solutions for Cisco routing, switching, wireless, and security products. According to Cisco's website, the benefits of the Express Foundation specialization include:

- Improving business resilience through integrated security and high-availability
- Increasing readiness and flexibility to support new applications and services
- Raising technical competency in integrated Cisco solutions
- Gaining competitive advantage through understanding how Cisco offerings compare to other point product and technology offerings

In attaining this specialization, ICS is now qualified to support customers with their Express Foundation needs in the United States.

###

Cisco is the worldwide leader in networking that transforms how people connect, communicate and collaborate. Cisco hardware, software, and service offerings are used to create the Internet solutions that make these networks possible - giving individuals, companies, and countries easy access to information anywhere, at any time.

ICS is a technology solutions provider focused on IP-Centric communications for First Responders, Emergency Communications, Disaster Recovery, and Continuity of Operations. Specializing in the design, development, and implementation of IP-Based communications, ICS provides turnkey solutions for Voice, Video and Data in support of Incident Command and Communications. Using these tools, emergency responders and crisis leadership can rapidly establish essential command presence, resource control, and communication interoperability allowing for critical situational awareness, response and mitigation.
