

Incident Communication Solutions and Squire Tech Solutions Partner to Introduce the ICS *pCom*[™] 355 System for Public Safety, Military and Civilian Federal Markets

Orlando, FL – November 3, 2009— Incident Communication Solutions, LLC (ICS), an IP-Centric mobile and tactical communication solutions provider, announces its newest self-contained communication solution delivered in partnership with Squire Tech Solutions, LLC. Unveiled today during the 2009 National EMEX Conference, the *ICS pCom*[™] 355 is the latest in a line of comprehensive, turnkey communications solutions which include the TICS® Tactical Incident Communications System, the Comms-ONE® SUV and other Mobile Command Systems featuring advanced IP networking and communications.

Building upon the strengths and versatility of the *pCom*[™] 300, developed by Squire Tech Solutions, this first-of-its-kind self contained site power, lighting, tower, and communications mobile infrastructure system offers a seven day on-board diesel fuel supply, power generation system, auto-acquisition satellite antenna, NEMA4X equipment enclosure, and pneumatic tower on a robust small trailer-based platform. The *ICS pCom*[™] 355 builds upon this platform and adds features and functionality providing comprehensive communications interoperability and key capabilities for Public Safety, Military and Civilian Federal markets.

The *ICS pCom*[™] 355 offers a complete incident response communications suite including: Cisco Unified IP communications, ICS Outrigger™ Network Extension Module (for expansion of services into fixed facilities), Analog FXO and FXS ports, Cellular voice gateway modules, Raytheon's ACU-M Interoperability Switch with 4 Motorola XLT mobile base units, and integrated on-board MTR-2000 VHF Continuous Duty Repeater. The entire system is designed to be deployed in under 15 minutes by front-line public safety personnel with no intervention from IT. Once operational, the system provides ICS Tactical-IP™ high-speed broadband satellite connectivity capable of 3Mbps downlink and 1Mbps uplink, ICS Tactical-Voice™ VoIP services, Radio Interoperability and On-scene radio communications in the most austere environments.

“We designed and engineered the *pCom*[™] 300 to provide versatility for our customer’s varying applications and needs. We understood from our channel partners and government customers that we needed to create a platform that can be leveraged and changed to serve the end users evolving requirements. I believe the *ICS pCom*[™] 355 takes the *pCom*[™] 300 product to the next level providing an exceptional and unique solution for the Public Safety, Military and Civilian Federal Markets,” said Michael Zalle, Vice President at Squire Tech Solutions, LLC.

“As a solutions provider of IP-Centric advanced communications systems, we look to partner with companies that have best-of-breed platforms that enable our technology solutions. Squire Tech has provided that with the *pCom* system,” said Christopher Boyd, Vice President and Chief Communications Architect for ICS. “Our specific customer markets require mission-ready critical communications. The combination of ICS turnkey communication solutions coupled with the solid physical foundation of the *pCom* provides our customers an unparalleled solution both in terms of capability and total cost of ownership.”

About Incident Communication Solutions, LLC
